

HAZELBERG LIMITED

www.hazelberg.biz

- Technology for the beneficiation of coal combustion product flyash

HAZELBERG LIMITED

Hazelberg has extensive experience and expertise in :

- the technology of recycling and processing the waste ash from coal fired power stations into quality flyash
- the development and operation of flyash business entity
- marketing and technical support to the end users of concrete grade flyash, as a cement replacement in the construction industry

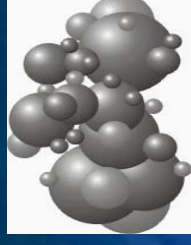

HAZELBERG LIMITED

Hazelberg is actively participating in setting up flyash processing plants in Asia.

Hazelberg is a key player in the processing and supply of quality flyash that meets international standard (ASTM & BS) to major infrastructure projects such as dams and bridges.

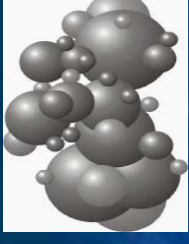

HAZELBERG LIMITED

While Hazelberg has experience in developing pioneer businesses status for flyash processing and applications in developing countries, it has also improved on the technology and efficiency to handle most raw coal ash types in Asia.

For each power station, Hazelberg offers customised cutting edge technology to cost effectively recycle the waste ash disposed. Stringent quality control measures are implemented into the system to ensure a reliable and consistent supply of quality flyash.

HAZELBERG LIMITED

Corporate Social Responsibility (CSR)

Hazelberg’s policy and business model embraces CSR in the locations it operates in.

Part of the profits from the business goes back to the local community in funding environmental improvement projects, such as water quality improvement, generation of new water wells and infrastructure improvements that relates to environment.
