Green House Gas Emissions Reduction Group (GHGER)

Anchor Company: *Asia Carbon Exchange*

Alliance Partners: *atea Environmental Technology, IUT Global, Hazelberg Asia, Intelleigen*

Sector: *Sustainable Development*

The GHGER group will develop sustainable development projects in Asia, contributing to global efforts in mitigating the adverse effects of global warming. The consortium is led by Asia Carbon Exchange Pte Ltd and comprises atea Environmental Technology Pte Ltd, IUT Global Pte Ltd, Hazelberg Asia Pte Ltd, and Intelleigen Legal LLC.

The consortium aims to provide potential project owners in Asia with sustainable technologies and competencies. The anchor, Asia Carbon, with its one-stop centre comprising carbon advisory, carbon finance and carbon asset management, will work closely with alliance partners, IUT Global and Hazelberg Asia to develop sustainable development projects in the areas of waste treatment and management solutions, flyash recycling and generation of green power. Besides complementing the above activities, atea Environment Technology will provide specialised services in the consultancy, design implementation and facility management of environmental treatment systems. Intelleigen LLC brings to the consortium its cross border expertise and market-leading capabilities in providing a legal framework for the formation of the consortium as well as relevant legal advice for the future development of the consortium and its projects.

Mr Ted Tan, Deputy Chief Executive Officer of International Enterprise Singapore (IE Singapore), noted, *"The consortium is a showcase of the commitment of Singapore-based companies to contribute towards global efforts to mitigate the adverse impact of climate change. This will help develop a new service cluster in emissions reduction in Asia, adding impetus to the development of environmentally-friendly services and technologies."*
